## RE: FREIGHT INCREASE

Dear valued customers, colleagues, and friends,

### Price changes to Sydney metro freight:

With recent changes in the construction industry due to fuel price increases and shortages in transport, Underground Civil Supplies has been forced to implement a new Sydney metro freight charge as of the 23rd March 2022. These changes are due to a number of issues, mainly with a driver shortages in transport and increased fuel levies.

### Our new freight charges will be

- Freight for conduit deliveries to sites in Sydney metro - \$150
- Freight for UCS truck to site - \$125

Please note there is still the option of picking up if you would like to avoid freight charges. We appreciate all of our customers working with us during this difficult times.

Kind Regards

Paul Smith  
General Manager  
Underground Civil Supplies
