

Statement

From: Wim Ipenburg (Product Manager)
Date: 18th December 2012
Subject: Statement: UV resistance
Ref: MD+ used with Filoseal +
Customer: Various

This statement has been written to confirm that our product MD+ which is used on its own, and part of a kit called "Filoseal+" has excellent resistance to oxygen, ozone, and ultraviolet (UV) light.

In general Silicones which is one of the ingredients in our product are widely used in applications where High (UV) resistance is required.

We guarantee providing our product is installed correctly, ultraviolet (UV) will not deteriorate the performance of the seal.

Aging tests show a lifespan of over 40 years in this application.
